

To Whom it may concern,
Please reject the NAB's petition 04-160.

I see this petition as censorship. I pay to receive content from a satellite and this petition is asking to limit the type of content I choose to receive. Because free radio is commercially driven the content is stricly mass appeal and does not serve all audiences. Further, because most stations with strong, quality signals are owned by the few major group owners in radio the amount of commercial content is extreme. I appreciate the limited or non existant commercial load and variety of programming available on satellite radio.

I urge you to think of the listener, consumer and artists that create music when considering whether to limit satellite radio's ability to distribute content.

Thank you.
